Independent radio programming, presentation & creative production

Thank you for your reception report

History: With a career beginning on Radio City from the Thames Estuary Shivering Sands Army Forts, various Offshore, BBC, ILR, Private and Overseas Radio Stations 'Bob's 60's Splash' was conceived in the 1980's and continues to date

Red Sands Radio launched from the Red Sands Army Forts in 2007, former base of Radio Invicta KING and Radio 390. The Fort however became unserviceable when the WWII wooden landing fenders continually banged and thumped against the Towers legs to eventually detach. Red Sands Radio though continued from purpose built studio on the South Quay of Whitstable Harbour

These days Red Sands Radio Productions is an independent radio programming, presentation, and creative production facility

Presented as 'live' not pieced together 'Bob's 60's Splash' is unique, fresh and authentic. It's now part of our London station's schedule and taken by select UK, European and World stations

See our www.bobleroi.co.uk for broadcast history and programme information

'Bob's 60's Splash' is pleased to received reports, comments and requests at studio@redsandsradio.co.uk
